Service Built Our Reputation, Our Technology Clarifies Why

Common Sense Technology Accurate & Customized

Plunkett's designed PestPoint software to fold effortlessly into your day.

You manage more than just pest control, so PestPoint delivers clear, accurate, timely information to you. No user names, no passwords, no remembering how to run the reports or wondering if you ran the right report. We have been refining our trending and log reporting for more than a decade. Check it out to understand why our clients have used words like "break-through" and "leapfrogged the competition", and "stellar" to describe PestPoint.

When Details Matter

The detail you need to review for pest control can vary from a *glance at a flat-line trend report* to an *explanation of every trap the technician placed*.

PestPoint recognizes that most often things are going well. The system sends you thumbnail trend charts for your review. Again, no user names, no passwords, just a glance at your inbox. When you need the detailed information, you will find it completely custom written for your facility and your pest issue. No drop down menus for our technicians to hurry through and miss recording what might turn out to be critical information.

Q: What's worse than having an auditor dig into the details of your pest control reports?

A: Wondering if the data is accurate, that's what.

Our data entry and information review process turned conventional wisdom on its head. Imagine this: our technician is the *first* person to see the trends and reports before saving the information. Our technicians don't enter hundreds of tiny data points into a PDA and hope it all comes out well when someone runs a report.

Clear Information, Great Results

Plunkett's crystal clear trend charts and customized log reports leave nowhere for lousy results to hide. If the charts look bad, we go after the bugs. The good news is this crystal clear information is delivered weekly to everyone who needs it. No surprises. No uncomfortable updates to your boss and no bombshells during your audits.

In the end, it's Plunkett's service that makes the difference. So let the truth jump at you.
